

NATHASHA MANAGE

Software Engineering Intern

+94 71 105 0237 | nathashawarnasinghe9@gmail.com
[Nathasha Manage](#) | [GitHub](#) | [NathashaManage Portfolio](#)

PROFESSIONAL SUMMARY

Third-year Information Technology undergraduate at the Faculty of Information Technology, University of Moratuwa, with a strong passion for full-stack development and delivering reliable, user-friendly software solutions. Possesses practical experience in developing frontend and backend components through academic and team-based projects. Demonstrates strong problem-solving, communication, and collaboration skills. Eager to learn emerging technologies and contribute to real-world projects. Currently seeking a Software Engineering Internship to apply and further develop technical skills in a professional environment.

EDUCATION

B.Sc. (Hons) Information Technology (2024 - Present) University of Moratuwa

- CGPA: 3.58/4.00

Sri Lanka Singapore Friendship College, Weeraketiya

- GCE Ordinary Level (2018) - 8 A Passes and 1 B Pass
- GCE Advanced Level (2022/2023) - Combined Mathematics: A | Chemistry: A | Physics: B

TECHNICAL SKILLS

Languages	: C, C#, Java, Python, JavaScript, TypeScript
Frontend	: React, Vite, Material UI, HTML, CSS, Axios, Zod
Backend & APIs	: ASP.NET Core Web API, Node.js, Express.js, RESTful APIs
Databases & ORM	: Microsoft SQL Server, MongoDB, Entity Framework Core, Mongoose, Database Design
Authentication & Security	&: JWT, BCrypt, OAuth 2.0, Google Sign-In, Role-Based Access Control
Embedded Systems & IoT	&: ESP32, ESP32-CAM, R503 Fingerprint Sensor, PIR Sensor, Biometric Authentication, Hardware-Software Integration
Tools & Development	: Git, GitHub, Postman, Swagger, Visual Studio, VS Code, SQL Server Management Studio
Concepts	: Full-Stack Development, Object-Oriented Programming, API Integration, State Management

PROJECTS

UBE - Unified Booking Engine

Full-Stack Web Application

- Built a responsive multi-vendor booking application with dedicated customer, vendor, administrator, and super-administrator portals.
- Developed end-to-end booking workflows covering service search, availability, cart, checkout, payment, booking confirmation, reviews, and notifications.
- Implemented vendor tools for onboarding, listing management, seasonal pricing, availability management, booking administration, payouts, and performance dashboards.
- Integrated REST APIs and SignalR for secure data exchange, real-time system updates, and push notifications.
- Added protected routing, role-based authorization, email verification, password recovery, and two-factor authentication.
- Created reusable and type-safe UI components and validated forms using React, TypeScript, Material UI, React Hook Form, and Zod.

Technologies: React, TypeScript, Material UI, React Hook Form, Zod, ASP.NET Core Web API, Entity Framework Core, SQL Server, REST APIs, SignalR, JWT

GitHub: [Frontend Repository](#) | [Backend Repository](#)

TaskFlow – Mini Todo Application

Frontend Web Application

- Developed a responsive task management application using React and Vite with an accessible and mobile-friendly interface.
- Implemented task creation, editing, deletion, completion tracking, priority levels, and date-based filtering.
- Used Local Storage to preserve tasks between browser sessions and Framer Motion to provide smooth interface transitions and animations.

Technologies: React, JavaScript, CSS, Vite, Framer Motion, Local Storage

GitHub: [ToDoApp Repository](#)

DailyDish - Food Delivery Web Application

Full-Stack Web Application

- Developed a full-stack food ordering application with a customer storefront and an administrative dashboard using the MERN stack.
- Built interactive interfaces for browsing food categories, selecting product options, managing shopping carts, and placing orders.
- Implemented user registration, login, and role-based access control to secure customer accounts and administrative operations.
- Developed an admin dashboard for managing menu items, categories, prices, stock availability, and order statuses.
- Designed RESTful APIs and MongoDB schemas for users, food items, shopping carts, and orders, with server-side validation.
- Integrated the React frontend with backend APIs using centralized state management to synchronize cart data and customer interactions.
- Implemented order history and product option snapshots to preserve purchase details when menu information changes.

Technologies: React.js, JavaScript, HTML, CSS, Node.js, Express.js, MongoDB, Mongoose, JWT

GitHub: [Frontend Repository](#) | [Backend Repository](#)

Gate Sentinel - Smart Gate Lock System

Microcontroller-Based Application

- Designed and developed an IoT-based smart door-lock system that improves home security through biometric authentication, motion detection, and real-time monitoring.
- Integrated an ESP32-CAM, R503 fingerprint sensor, and PIR sensor to support biometric access, remote monitoring, live notifications, and motion detection.
- Implemented remote-control functionality and backup-power support to maintain secure and uninterrupted operation during power outages.

Technologies: ESP32, ESP32-CAM, R503 Fingerprint Sensor, PIR Sensor, Embedded Systems, IoT, Biometric Authentication, Hardware-Software Integration

LEADERSHIP & EXTRACURRICULAR ACTIVITIES

Member – Membership Growth Committee

Leo Club of University of Moratuwa | 2025

Participated in membership engagement initiatives, club activities, and collaborative volunteer projects while developing communication, teamwork, and leadership skills.

REFEREES
